Academic Program Maps Update:

Over the past year the Curriculum Systems team in the Office of Academic Affairs have been working with Departments and Colleges to develop Academic Program Maps for each of the Undergraduate degree programs. These maps will be used by prospective students to give an overview of the program and a path to follow to complete the degree program in the most efficient way possible. These maps highlight important gateway courses and program milestones that should be reached at different points in the academic student's career to insure progression and graduation.

KSU is getting ready to launch these maps to the public. Members of the Curriculum Systems team will be meeting with Department Chairs and Program Coordinators over the next several weeks to review the maps for accuracy and address any inconsistencies or issues. Your cooperation is appreciated as we work through this process.
